

Use Case ID	UC-ELE003
Module	Election
Sub Module	
Summary	Search for election
Description	Users search for an election
Precondition	User has appropriate security role permissions
Expected Result	The system shall provide a sortable summary list of election(s) matching search criteria displayed with pertinent information, where items in the list are selectable and will open the relevant election information.
Detailed Process Flow	<ol style="list-style-type: none"> 1. User makes selection to search for an election <ol style="list-style-type: none"> 1.1. The system shall present data entry fields to search for election(s). These shall include but are not limited to: <ul style="list-style-type: none"> • Year • Name(s) • Type • District/Jurisdiction/Contest 2. User enters data as search conditions <ol style="list-style-type: none"> 2.1. Users shall be required to enter data in at least one search field. <ul style="list-style-type: none"> • If searching by “year” the value defaults to the current year 2.2. Users shall be able to use wildcards. Wild cards shall include (SQL examples are given but could be any standard wildcard notation) <ul style="list-style-type: none"> • Zero or more characters (%) • A single character (_) • A single number or letter (#,?) • Ranges or lists and their negation (^[,]) 3. User executes search. 4. System shall display results. <ol style="list-style-type: none"> 4.1. A summary list of election(s) matching search criteria is displayed, with pertinent identifying information, where items in the list are selectable to open the pertinent election configuration. Pertinent identifying information include: <ul style="list-style-type: none"> • Election Date • Election ID • Election name(s) • Election Type • Default election • SOS ID
