Early Ballot Pick-up Program

The Department has established an Early Ballot Pickup Program for the June 7 Presidential Primary election to expedite ballot processing and improve election efficiency. On Election Day, 56 two-person teams will be deployed to pick up ballots at precincts participating in the program. In accordance with [State](#) law, sealed ballots will be removed from participating polling locations before the closing of the polls and delivered to the Department's headquarters for processing.

The locations of the precincts participating in the Early Ballot Pickup program will be posted on the Department's website 48 hours before Election Day. All poll workers are being trained to prepare for early ballot pickup and to answer questions at polling locations. To ensure that voters are aware of the Early Ballot Pickup program, posters will be displayed at participating precincts notifying the public that an early ballot pickup will be conducted at the location.
